Hose & Pipe Floats

2-3 Inch Pipe Floats w/ Clamp Inserts

Features & Benefits

- Grip-Tite – This feature compresses and adds friction to the pipeline preventing slippage.
- Heavy-Duty solid wall molded floats prevent punctures.
- Easy Stack – This feature solves common storage and transporting problems. Built in legs on the bottom of the float and molded-in recesses on the top of floats allow for easy loading and unloading of containers and trucks using forks and hand trucks. Manual loading is no longer required.
- SmoothGlide - Tapered ends of the outside of the floats decrease water and wind resistance. Tapered ends on the inside of the float allow the pipeline to move freely.

Specifications:

Outside Diameter	Inside Diameter	Overall Length	Weight	Submergence at 50%
12" / 305 mm	2"-3.65" / 50-93 mm	16" / 406 mm	9 / 4 kg	15 Lbs. / 6.8 kg

*Set includes 2 float halves with bolting hardware.
