Hose & Pipe Floats

20-Inch Pipe Floats w/ Clamp Inserts

Features & Benefits

- **Clamp Tite** – This feature compresses and adds friction to the pipeline preventing slippage.
- **Heavy-Duty solid wall molded floats** prevent punctures.
- **Stack-N-Lock** – This feature solves common storage and transporting problems. Built in legs on the bottom of the float and molded-in recesses on the top of floats allow for easy loading and unloading of containers and trucks using forks and hand trucks. Manual loading is no longer required.
- **EzGlide** – Tapered ends of the outside of the floats decrease water and wind resistance. Tapered ends on the inside of the float allow the pipeline to move freely.

Specifications:

Outside Diameter	Inside Diameter	Overall Length	Weight	Foam Buoyancy at 50%
46.5" / 1181 mm	20.65" / 525 mm	45" / 1143 mm	187 Lbs. / 85 kg	820 Lbs. / 372 kg

*Set includes 2 float halves with bolting hardware.
