Hose & Pipe Floats

3-Inch Pipe Floats w/ Clamp Inserts

Features & Benefits

- **Clamp Tite™** – This feature compresses and adds friction to the pipeline preventing slippage.
- **Heavy-Duty solid wall molded floats** prevent punctures and eliminates the need for foam.
(Foam is optional)
- **Stack-N-Lock™** – This feature solves common storage and transporting problems. Built in legs on the bottom of the float and molded-in recesses on the top of floats allow for easy loading and unloading of containers and trucks using forks and hand trucks. Manual loading is no longer required.
- **EzGlide** – Tapered ends of the outside of the floats decrease water and wind resistance. Tapered ends on the inside of the float allow the pipeline to move freely.

Specifications:

Outside Diameter	Inside Diameter	Overall Length	Submergence at 50%
13.9" / 353 mm	4.5" / 114 mm	20" / 508 mm	26 Lbs. / 11.8 kg

*Set includes 2 float halves with bolting hardware.
