La Paz 4D-TM-TA

La Paz 4D-TM-TA is made to be a survivor. All the pump's critical components are upgraded: including a heat-treated ductile iron impeller and volute, hardened 17-4 drive shaft, and stainless couplings. The two efficient hydraulic gear motors are self-lubricated by the hydraulic fluid powering the pump. There are absolutely no wear plates, no pump bearings and no mechanical seals to replace in the pump.

For pumping water & clear fluids

The only submersible pump with no mechanical seals, no wear plates and no internal friction.
